Introduction

Maroochydore State High School provides every student with the opportunity to prepare for success in life through learning and high quality education. Our pathways supported curriculum is built on strong traditional values of Learning, Respect and Safety, which is enhanced by excellent teaching and learning experiences.

21st Century Skills

Acquiring a broad set of skills during senior schooling is critical to student success in further education and in life. The world is changing and research suggests that to meet the demands of the 21st century, students need more than core subject knowledge.¹ In order to be successful, they need to become lifelong learners and global citizens who create opportunities and are confident in pursuing their passions.²

As a result, the Queensland Curriculum and Assessment Authority (QCAA) has identified and defined a set of 21st century skills based on national and international research about the skills students need in the 21st century. Along with literacy and numeracy, these 21st century skills are the underpinning factors that shape not only the development of the General senior syllabuses³ but underpin Applied senior syllabuses and VET curriculum and courses.

These 21st century skills will help prepare Maroochydore State High School students by giving them the knowledge, skills and confidence they need to be equipped for the demands of higher education, work and life and to participate effectively in the community and the economy in a complex and rapidly changing world.

Curriculum Philosophy

The following principles are fundamental to our philosophy

1. Every graduating student leaves with a QCE or QCIA and a VET qualification or ATAR of worth. Worth refers to pathways and qualifications that are in demand and lead to employment, particularly in growth industries in our local area.
2. Senior secondary curriculum provides three clear pathways (university, tertiary options and employment) to accommodate the different aspirations, orientations and capacities of our students.
3. To best prepare all students for further education, training, work and ultimately successful transition to adulthood, all seniors will study at least one English and Maths course and participate in the pastoral care program.
4. Monitoring of student academic progress (and wellbeing) will occur on a regular basis and feedback provided to students and caregivers so that collaboratively we can work towards positive outcomes for all students.
5. Teachers will utilise research-based teaching strategies and use our clearly defined pedagogical framework to maximise learning outcomes. These strategies and learning experiences will reflect the developmental stages of our young people.

Senior Secondary Standards

All senior secondary students at Maroochydore State High School are required to demonstrate behaviours that are aligned with the school values of Learning, Respect and Safety, which are clearly outlined in the MSHS Student Code of Conduct.

It is also expected that given students are post-compulsory in age, they will demonstrate workplace appropriate behaviours, some examples of which include:

- Responsibility for personal progress, actions and choices.
- Punctuality.
- Preparedness.
- Following dress and grooming requirements.
- A positive attitude.

Performance Concern (PC) Monitoring Process

The academic outcomes, attendance, effort and behaviour of all senior secondary students are closely monitored across all subjects during each term. If concerns arise because:

- Attendance rate falls below 92%
 - Students demonstrate unsatisfactory Effort and/or Behaviour in two or more subjects on their reports
 - and Special Provision arrangements have not been organised through the appropriate support channels then;
1. **PC Level 1:** Support will be given to assist students to achieve an appropriate standard with parent and student contact made. If significant improvements in the areas of concern are not demonstrated, then the student moves to PC Level 2.
 2. **PC Level 2:** An interview is held with the Deputy Principal and/or other support staff to determine if continued enrolment is a viable option. If improvements are still not demonstrated after a pre-determined time period, then the student will be given a Show Cause or Warning for Cancellation of Enrolment notice.
 3. If **Cancellation of Enrolment** proceeds, the student will be offered support to move into other earning or learning options.

Student Wellbeing

Our young people are growing up in a world driven by new technologies and economic globalisation. Their future means they need a new set of cognitive, social and emotional skills for success.

We know that a supportive environment that combines a focus on wellbeing and learning is optimal — without one, the other will not happen. Responding to individual and group differences, promoting collaborative learning, connecting to the hearts and minds of every student and teaching students how to manage their wellbeing, are just some of the ways our teachers are making sure students thrive. To further support this, we provide inclusive environments that nurture the wellbeing of all students so they become resilient lifelong learners who respond positively to their changing world and pursue their passions with confidence.

There will be times however when students may require extra support for various physical, social and/or emotional reasons. In these circumstances, we use a wrap-around approach which involves parents, school support staff and services, health professionals and other agencies to best support our students. In particular, our Student Services team includes:

- School Guidance Officers
- Deans of Students
- School Based Youth Health Nurse
- School Based Police Officer
- School Chaplain
- IFYS and other youth support workers

You can make an appointment to see any of the Student Services team via the Student Counter at the Office or visit them in G Block.

Subject Resources

Textbooks and Resources

Maroochydore SHS runs a Student Resource Scheme (SRS). Parents can voluntarily join the scheme or elect to purchase these same texts and learning resources (including publications, work sheets, diaries etc.) as listed on Subject Resource List (available at the Office). The scheme purchases in bulk and has the buying power to significantly reduce the costs to parents. The SRS is approved by the P&C Association each year.

The additional user-pays subject levies for consumables (for example, excursions) are a requirement for some subjects. If these levies cannot be met, it will be necessary for students to choose another subject that does not have the associated costs.

Computers: BYOd Program

Maroochydore State High School recognises the critical role that digital technologies play in enhancing student learning outcomes.

Digital Technologies:

- Enhance independence and self-initiated learning among students
- Promotes the development of 21st Century teaching and learning
- Facilitates the creation and sharing of knowledge
- Allows differentiation in learning

To facilitate this, Maroochydore State High School embraces a Bring Your Own Device (BYOd) program for all students.

What is a Bring Your Own Device (BYOd) scheme?

Students are required to provide their own laptop device for use at school. The school will provide access to the internet, printing services and shared network drives for these devices and allow students to use the devices in class to support teaching and learning. Students are also able to install the Adobe software suite onto their devices at no extra charge.

One of the rationales for the BYOd scheme is that students will be comfortable using a device that they "own" and manage themselves. They should be familiar with how it works and the software installed on the device.

A minimum specifications table is available via the Office to assist in purchasing a suitable Windows or Apple device.

There is an annual connectivity and licensing fee to cover the cost of participating in the BYOd program.

Participation in the BYOd scheme

Parents and families who choose to participate in the BYOd scheme need to:

- Read and understand the policies and procedures outlined in this document.
- Sign the BYOd Student Participation and Connectivity Request Form
- Pay the connectivity and licensing fee upon invoice
- Read and understand the Acceptable Use Policy (AUP)

Senior School Qualifications

Senior Education Profile

Students in Queensland are issued with a Senior Education Profile (SEP) upon completion of senior studies. This profile may include a:

- Statement of Results
- Queensland Certificate of Education (QCE)
- Queensland Certificate of Individual Achievement (QCIA).

For more information about the SEP see: www.qcaa.qld.edu.au/senior/certificates-qualifications/sep.

Queensland Certificate of Education (QCE)

The Queensland Certificate of Education (QCE) is Queensland's senior secondary schooling qualification. It is internationally recognised and provides evidence of senior schooling achievements.

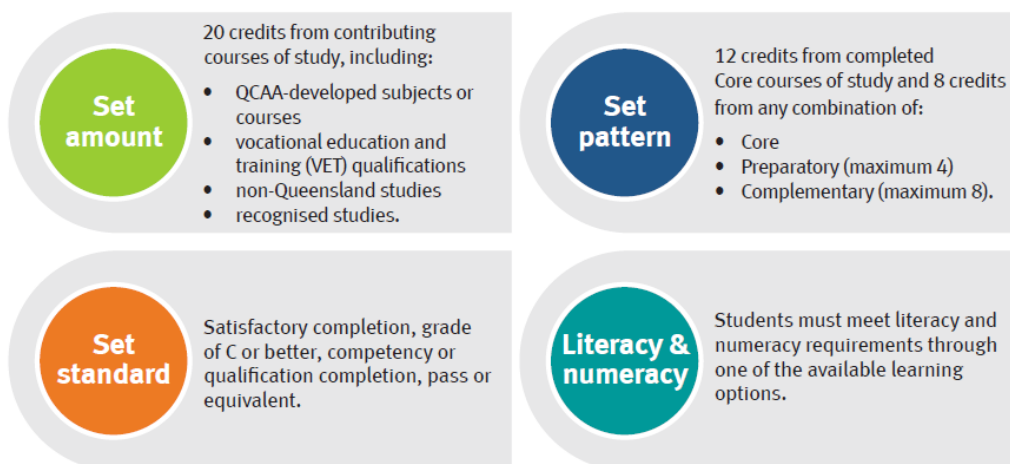

The flexibility of the QCE means that students can choose from a wide range of learning options to suit their interests and career goals. Most students will plan their QCE pathway in Year 10 when choosing senior courses of study and a Queensland Curriculum and Assessment Authority (QCAA) learning account will be opened.

To receive a QCE, students must achieve the set amount of learning, at the set standard, in a set pattern, while meeting literacy and numeracy requirements. The QCE is issued to eligible students when they meet all the requirements either at the completion of Year 12, or after they have left school. Students who do not meet the QCE requirements can continue to work towards the certificate post-secondary schooling.

The QCAA awards a QCE in the following July or December, once a student becomes eligible. Learning accounts are closed after nine years; however, a student may apply to the QCAA to have the account reopened and all credit continued.

QCE Requirements

As well as meeting the following requirements, students must have an open learning account before starting the QCE and accrue a minimum of one credit from a Core course of study while enrolled at a Queensland school.

For more information about the QCE requirements, see the following factsheets, which are available on the **QCAA website at www.qcaa.qld.edu.au**:

- QCE credit and duplication of learning
- QCE credit: completed Core requirement
- QCE literacy and numeracy requirement.

Queensland Certificate of Individual Achievement (QCIA)

The Queensland Certificate of Individual Achievement (QCIA) reports the learning achievements of eligible students who complete an individual learning program. At the end of the senior phase of learning, eligible students achieve a QCIA. These students have the option of continuing to work towards a QCE post-secondary schooling.

Statement of Results

Students are issued with a Statement of Results in the December following the completion of a QCAA (Queensland Curriculum & Assessment Authority) - developed course of study. A new statement of results is issued to students after each QCAA-developed course of study is completed.

A full record of study will be issued, along with the QCE qualification, in the first December or July after the student meets the requirements for a QCE.

Australian Tertiary Admission Rank (ATAR)

From 2020, the Australian Tertiary Admission Rank (ATAR) will replace the Overall Position (OP) as the standard pathway to tertiary study for Queensland Year 12s. The ATAR is the primary mechanism used nationally for tertiary admissions and indicates a student's position relative to other students. The ATAR itself is the standard measure of overall school achievement and is a rank indicating a student's position overall relative to other students. It is expressed on a 2000-point scale from 99.95 (highest) down to 0, in increments of 0.05. ATARs below 30 will be reported as '30.00 or less'.

The Queensland Tertiary Admissions Centre (QTAC) will calculate ATARs for Queensland school leavers.

ATAR Calculation

The calculation of an Australian Tertiary Admission Rank (ATAR) will be based on a student's:

- best five General subject results or
- best results in a combination of four General subject results plus an Applied subject result or a Certificate III or higher VET qualification.

English and Mathematics requirements for an ATAR

To be eligible for an ATAR;

- Satisfactory completion of a QCAA English subject is required
- Satisfactory completion will require students to attain a result that is equivalent to a Sound Level of Achievement in one of five subjects — English, Essential English, Literature, English and Literature Extension or English as an Additional Language.
- Only General English subjects or Applied English subjects can be included in the ATAR, but not both.
- Only General Mathematics subjects or Applied Mathematics subjects can be included in the ATAR, but not both.

While students must meet this standard to be eligible to receive an ATAR, it is not mandatory for a student's English result to be included in the calculation of their ATAR.

Vocational Education and Training (VET) and the ATAR

Each VET qualification level (Certificate III or higher) will have a single scaled score that can be included in a student's ATAR. For example, a Certificate III in Hospitality and a Certificate III in Fitness will each have the same scaled score; this will be regardless of the duration or area of study of the Certificate III.

It is expected that the scaled score for a completed VET diploma will be higher than that for a completed VET Certificate IV, which in turn will be higher than the scaled score for a completed VET Certificate III.

Pathways to Success

At Maroochydore State High School, we offer *Excellence in Education for All*. This means we value all pathways that lead students to not only achieve a senior qualification but to become responsible citizens who can work productively and/or contribute to their community. Students are encouraged to select subjects as part of their senior program based on their knowledge needs, interests/talents and aspirations to lead them on a University, Tertiary Options or Employment pathway.

Pathways TO SUCCESS

UNIVERSITY PATHWAY

DRIVE PROGRAM Achieving A's and B's. STRIVE AND SERVE PROGRAM: Achieving A's and B's.	EXTENSION OR GENERAL CLASSES Achieving at least B's in English, Maths and Science. Meet pre-requisites for Year 11 subject selection. Complete Certificate II.	QUALIFICATIONS QCE, ATAR SENIOR SUBJECTS Five general subjects includes General English, Maths and one other pathway option.	QTAC Application for University and TAFE. Australian Defence - Officer Entry. Full-Time Employment.
--	--	---	---

TERTIARY OPTIONS PATHWAY

DRIVE PROGRAM Achieving mainly B's. STRIVE AND SERVE PROGRAM Achieving mainly B's.	EXTENSION OR GENERAL CLASSES Achieving at least C's. Meet pre-requisites for Year 11 subject selection. Complete Certificate II.	QUALIFICATIONS QCE, Certificate III, Certificate IV. SENIOR SUBJECTS Six subjects: combination of General, Essential, Applied VET Certificate III, IV or Traineeship options.	Alternate University entrance, TAFE. Apprenticeships/ Traineeships. Australian Defence – General Entry: Trades. Full-Time Employment.
---	--	--	--

EMPLOYMENT PATHWAY

DRIVE PROGRAM Achieving at standard in Mathematics and English. STRIVE AND SERVE PROGRAM Achieving at standard.	ESSENTIAL CLASSES Achieving at standard in English and Maths. Complete Certificate II in Skills for Work and Vocational Pathways.	QUALIFICATIONS QCE / QCIA, Certificate I, II, III. SENIOR SUBJECTS Six subjects - combination of Essential, Applied VET and traineeship options.	Apprenticeships/ Traineeships, TAFE. Australian Defence – General Entry: Non-technical. Full-Time Employment.
--	--	---	---

How to choose senior subjects

It is important to plan before choosing your senior subjects. Consider the following:

1. What knowledge do you need? What would you like to know?
2. Do you have skills that you would like to develop further? What are your interests?
3. What careers are you interested in pursuing?
4. What have been your academic strengths and weaknesses so far?
5. Have you met Year 10 pre-requisites? What qualifications do you need for future courses?
6. What are the tertiary entry requirements for courses you are interested in?

Many students do not know what they want to do when they leave school, but choosing the right combination of subjects will provide balance and keep options open.

The QCAA has many resources available including the Plan your Pathway fact sheet (below) which you can access at www.qcaa.qld.edu.au/senior/new-snr-assessment-te/senior-pathway-planning

① Think about your abilities, interests and ambitions

Whatever you want to do when you leave school, you can choose from a wide range of senior secondary learning options to help you get there. Consider the subjects you're good at and you enjoy.

What do you want to do?	What learning options will get you there?
I plan to do further study	<input type="checkbox"/> QCAA General subjects <input type="checkbox"/> school-based apprenticeships and traineeships
I'd like to learn a trade	<input type="checkbox"/> QCAA Applied subjects <input type="checkbox"/> university subjects completed while at school
I want to find a job	<input type="checkbox"/> QCAA Short Courses <input type="checkbox"/> workplace learning
	<input type="checkbox"/> vocational education and training (VET) courses <input type="checkbox"/> recognised certificates and awards

② Check what you need for your QCE

To receive a Queensland Certificate of Education (QCE), you must achieve the set amount of learning, at the set standard, in a set pattern, while meeting literacy and numeracy requirements. You can choose from the learning options above.

③ Check tertiary entrance requirements and VET qualifications you may need

Tertiary entrance	VET
<p>To get into many tertiary courses, you'll need an Australian Tertiary Admission Rank (ATAR). To be eligible, you have to:</p> <ul style="list-style-type: none"> • satisfactorily complete an English subject • complete 5 General subjects, or 4 General subjects + 1 Applied subject or VET course at Certificate III or above. <p>Some university courses also have other prerequisites.</p>	<p>VET courses develop your skills and get you ready for work. When you study VET, you can leave school with:</p> <ul style="list-style-type: none"> • a statement of attainment (when you complete one or more units) • qualification/s and a record of results (when you meet all the requirements).

④ Develop your plan

- Talk with your school about available courses, then explore your options and find your pathway at www.qcaa.qld.edu.au/senior/new-snr-assessment-te.
- Check the QTAC website for eligibility requirements.

Career planning resources

Maroochydore State High School Careers Website

For further comprehensive information on all things career related, visit our school careers page at: www.maroochydocareers.com or investigate the following websites

- **Job Outlook** is an Australian Government website providing information about Australian careers, labour market trends and employment projections, covering around 350 individual occupations. It includes an interactive **Career Quiz** that helps to identify work styles and suggests careers options.
- **myfuture** is a comprehensive career and education website that help students explore career options based on their skills and interests.
- **Open Colleges** contains career information, links and resources about career pathways and relevant online learning courses.
- **myPROFILER** is a career profiling tool developed by TAFE Queensland that uses visual responses to stimulus to suggest career choices that match talents, skills and interests.
- **The Good Universities Guide** is a course comparison website that helps students find courses, explore careers and search for scholarships at Australian universities, TAFEs and training colleges.
- **Study Assist** is an Australian Government website giving students information about assistance for financing tertiary study.
- **Apprenticeships Info** is a one-stop shop for information about apprenticeships and traineeships in Queensland. **Australian Apprenticeships** provides information about Australian apprenticeships for employers, job seekers, school leavers and career advisers. **Australian Apprenticeships Pathways** helps students find available apprenticeships and provides links to job pathways charts and job descriptions.
- The **Group Training Australia** website is a directory of organisations offering traineeships and apprenticeships across the country.
- **MySkills** provides information about vocational education and training and connects students with nationally accredited training providers. Queensland Skills Gateway contains everything students need to know about vocational education and training in Queensland, including courses, training providers, government funding and career pathways.
- **JobActive** includes job advertisements, information about training providers and tips on résumé writing and writing job applications. JobAccess contains information about disability employment services, including job advertisements, financial support for workplace modifications and support for finding or changing jobs.

Senior subjects

Maroochydore State High School offers three types senior subject syllabuses — General, Applied and Vocational Education and Training courses (VET courses). Results in General, Applied subjects and VET subjects contribute to the QCE and may contribute to an ATAR calculation. No more than one result in an Applied subject or Certificate III VET subjects can be used in the calculation of a student's ATAR.

Typically, it is expected that most students will complete these courses across Years 11 and 12. All subjects build on the P-10 Australian Curriculum.

General syllabuses

General subjects are suited to students who are interested in pathways beyond senior secondary schooling – University and Tertiary options Pathways.

Applied syllabuses

Applied subjects are suited to students who are primarily interested in pathways beyond senior secondary schooling that lead to vocational education and training or work –Tertiary options and Employment Pathways.

Underpinning factors

All senior syllabuses are underpinned by:

Literacy — the set of knowledge and skills about language and texts essential for understanding and conveying content

Numeracy — the knowledge, skills, behaviours and dispositions that students need to use mathematics in a wide range of situations, to recognise and understand the role of mathematics in the world and to develop the dispositions and capacities to use mathematical knowledge and skills purposefully.

General syllabuses

In addition to literacy and numeracy, General syllabuses are underpinned by:

21st century skills — the attributes and skills students need to prepare them for higher education, work and engagement in a complex and rapidly changing world. These include critical thinking, creative thinking, communication, collaboration and teamwork, personal and social skills, and information & communication technologies (ICT) skills.

Applied syllabuses

In addition to literacy and numeracy, Applied syllabuses are underpinned by:

applied learning — the acquisition and application of knowledge, understanding and skills in real-world or lifelike contexts

community connections — the awareness and understanding of life beyond school through authentic, real-world interactions by connecting classroom experience with the world outside the classroom

core skills for work — the set of knowledge, understanding and non-technical skills that underpin successful participation in work.

General syllabuses: Structure

The syllabus structure consists of a course overview and assessment.

General syllabuses course overview

General syllabuses are developmental four-unit courses of study.

Units 1 and 2 provide foundational learning, allowing students to experience all syllabus objectives and begin engaging with the course subject matter. It is intended that Units 1 and 2 are studied as a pair. Assessment in Units 1 and 2 provides students with feedback on their progress in a course of study and contributes to the awarding of a QCE.

Students should complete Units 1 and 2 before starting Units 3 and 4.

Units 3 and 4 consolidate student learning. Assessment in Units 3 and 4 is summative and student results contribute to the awarding of a QCE and to ATAR calculations.

General syllabus: Assessment

Units 1 and 2 assessments

Schools decide the sequence, scope and scale of assessments for Units 1 and 2. These assessments will reflect the local context. Teachers determine the assessment program, tasks and marking guides that are used to assess student performance for Units 1 and 2.

Units 1 and 2 assessment outcomes provide feedback to students on their progress in the course of study. At least *two* but no more than *four* assessments for Units 1 and 2 will be delivered. At least *one* assessment will be completed for *each* unit.

Schools report satisfactory completion of Units 1 and 2 to the QCAA and may choose to report levels of achievement to students and parents/carers using grades, descriptive statements or other indicators.

Units 3 and 4 assessments

Students complete a total of *four* summative assessments — three internal and one external — that count towards the overall subject result in each General subject.

Schools develop *three* internal assessments for each senior subject to reflect the requirements described in Units 3 and 4 of each General syllabus.

The three summative internal assessments need to be endorsed by the QCAA before they are used in schools. Students' results in these assessments are externally confirmed by QCAA assessors. These confirmed results from internal assessment are combined with a single result from an external assessment, which is developed and marked by the QCAA. The external assessment result for a subject contributes to a determined percentage of a students' overall subject result. For most subjects, this is 25%; for Mathematics and Science subjects it is 50%.

Instrument -specific marking guides

Each syllabus provides instrument specific- marking guides (ISMGs) for summative internal assessments.

The ISMGs describe the characteristics evident in student responses and align with the identified assessment objectives. Assessment objectives are drawn from the unit objectives and are contextualised for the requirements of the assessment instrument.

Schools cannot change or modify an ISMG for use with summative internal assessment.

Applied syllabuses: Structure

The syllabus structure consists of a course overview and assessment.

Applied syllabuses course overview

Applied syllabuses are developmental four -unit courses of study.

Units 1 and 2 of the course are designed to allow students to begin their engagement with the course content, ie the knowledge, understanding and skills of the subject. Course content, learning experiences and assessment increase in complexity across the four units as students develop greater independence as learners.

Units 3 and 4 consolidate student learning. Results from assessment in Applied subjects contribute to the award of a QCE and results from Units 3 and 4 may contribute as a single input to ATAR calculation.

A course of study for Applied syllabuses includes core topics and elective areas for study.

Applied syllabus: Assessment

Applied syllabuses use *four* summative internal assessments from Units 3 and 4 to determine a student's exit result.

At least *two* but no more than *four* internal assessments for Units 1 and 2 will be developed and these assessments will provide students with opportunities to become familiar with the summative internal assessment techniques to be used for Units 3 and 4.

Instrument specific- standards matrixes

For each assessment instrument, schools develop an instrument-specific standards matrix by selecting the syllabus standards descriptors relevant to the task and the dimension/s being assessed. The matrix is shared with students and used as a tool for making judgments about the quality of students' responses to the instrument. Schools develop assessments to allow students to demonstrate the range of standards.

Essential English and Essential Mathematics — Common internal assessment

Students complete a total of *four* summative internal assessments in Units 3 and 4 that count toward their overall subject result. Schools develop *three* of the summative internal assessments for each senior subject and the other summative assessment is a common internal assessment (CIA) developed by the QCAA.

The CIA for Essential English and Essential Mathematics is based on the learning described in Unit 3 of the respective syllabus. The CIA is:

- developed by the QCAA
- common to all schools
- delivered to schools by the QCAA
- administered flexibly in Unit 3
- administered under supervised conditions
- marked by the school according to a common marking scheme developed by the QCAA.
- The CIA is not privileged over the other summative internal assessment.

Summative internal assessment — instrument specific- standards

The Essential English and Essential Mathematics syllabuses provide instrument specific- standards for the three summative internal assessments in Units 3 and 4.

The instrument specific- standards describe the characteristics evident in student responses and align with the identified assessment objectives. Assessment objectives are drawn from the unit objectives and are contextualised for the requirements of the assessment instrument.

Vocational Education and Training (VET)

VET refers to education and training that focuses on delivering skills and knowledge required for specific industries. It is a learning option for students in the senior phase of learning. Student achievement in subjects with vocational competencies receives credit towards qualifications recognised nationally within the Vocational Qualification Framework (VQF).

Participating in VET can:

- provide credit points towards the attainment of a Queensland Certificate of Education and/or the attainment of a nationally recognised VET qualification
- receive an industry specific vocational Certificate or Statement of Attainment
- support students' transitions to employment, vocational and higher education pathways

Other benefits of participating in VET include (but are not limited to):

- obtaining practical experience from work
- gaining familiarity on how a workplace operates
- developing employability skills
- developing and improving interpersonal skills
- allowing students to explore the potential career path they would like to pursue

Students at Maroochydore State High School can access VET in a number of ways including:

- through Maroochydore State High School (RTO 30397) as a Registered Training Organisation
- at TAFE Queensland
- through another Registered Training Organisation
- through a School Based Apprenticeship or Traineeship

Vocational Education and Training (VET) in Schools allows students to remain enrolled at school while completing vocational training delivered either by Maroochydore State High Schools' Registered Training Organisation (RTO 30397) or by other external Registered Organisations.

Enrolment in the vocational qualifications and accredited courses listed will be subject to the DTET final publications of the 2026 Career Ready VETiS funded qualifications. Maroochydore State High School will finalise its delivery arrangements with SAS before confirming Career Ready VET enrolments for 2026.

Enrolment Options

Option 1

Choose a course that is delivered by qualified teachers at the School under our Registered Training Organisation (RTO 30397).

Option 2

Choose a course that is delivered by qualified teachers at the school under an external RTO.

Option 3

There are many Registered Training Organisations that offer nationally recognised training; these organisations offer programs specially targeting students in the Senior Phase of Learning. These include:

- TAFE Queensland
- Coastal Cookery Trade Training Centre (CCTTC)
- Sunshine Coast Technical Trade Training Centre (SCTTTC)

There are limited numbers in many of these courses, so it is important that you complete an expression of interest by given set date. Contact the Vocational Education Officer for further information.

Option 4

School Based Apprenticeships and Traineeships. Contact the Vocational Education Officer for further information.

VET qualifications

To ensure the requirements for the amount and breadth of learning for a QCE are met, limitations are placed on the amount of QCE credit that can contribute to the QCE for some VET qualifications.

Credit for the QCE is accrued when a student completes new learning. When students complete multiple VET qualifications, an RTO may transfer credit from completed units of competencies from one qualification toward completion of another qualification. New learning in VET is identified as units of competency that recorded as competent, rather than credit transfer. Credit transfer relates to learning in VET qualifications, which is different from credit contributing to a QCE.

QCE credit and qualifications from the same VET training package

When a student completes or partially completes multiple qualifications from the same VET training package, the highest level- qualification in the Core category of learning will contribute credit to a QCE. A student who completes only a Certificate I from a training package accrues credit in the Preparatory category of learning. A student who completes a Diploma or Advanced Diploma accrues credit in the Complementary category of learning.

To ensure the breadth of learning, a maximum of eight credits from the same training package can contribute to a QCE.

All completed qualifications are recorded on the statement of results.

VET Credit transfer and QCE credit

Credit accrues to the QCE when a student completes new learning.

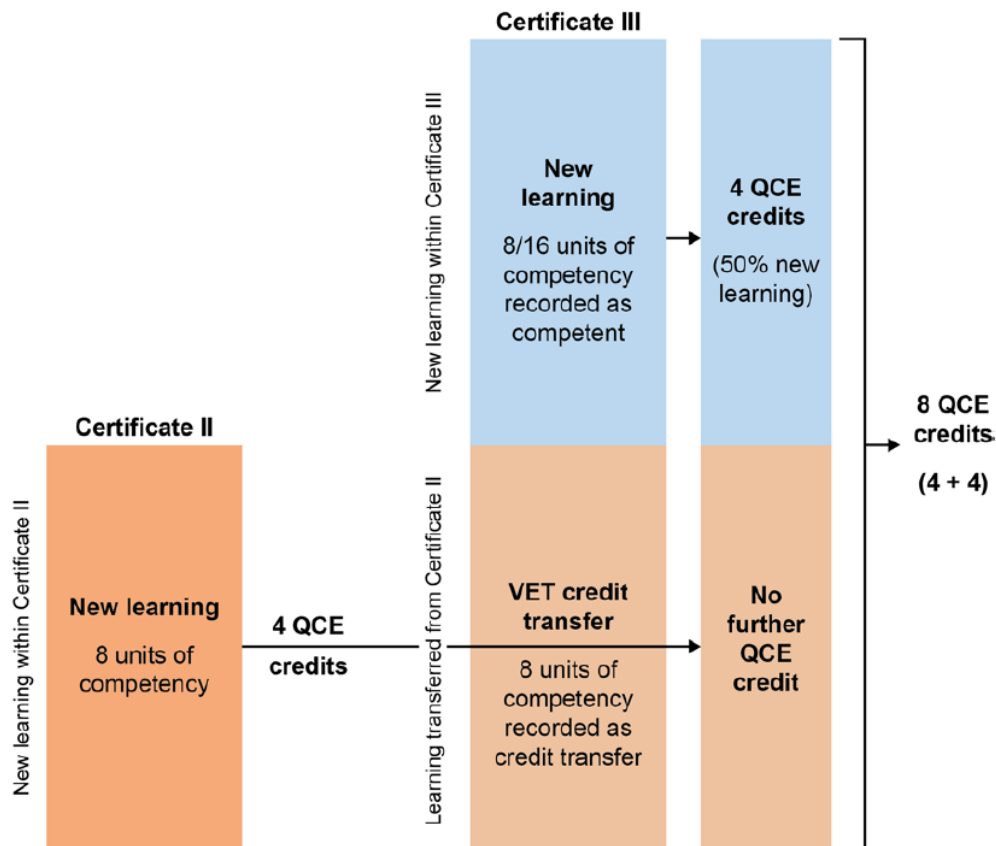

For certification, when competencies within a qualification are reported as credit transfer, this is not considered to be new learning. All completed VET qualifications are recorded on the statement of results.

The following table outlines the credit that contributes to a QCE when a VET qualification is completed or partially completed and units of competency are recorded as VET credit transfer.

QCE credit contribution with VET qualifications completed with a combination of new learning and VET credit transfer.

QCE credit	Amount of new learning completed
Full QCE credit	≥ 90%
75%	≥ 75%
50%	≥ 50%
25%	≥ 25%
0%	< 25%

Example of QCE credit for Certificates II and III with VET credit transfer from any training packages

VET Student Handbook

Maroochy State High School will, prior to course commencement, give students all relevant information about the course curriculum, program of study, availability of learning resources and appropriate support services. Students will also be given access to a current copy of the curriculum associated with the qualification.

Roles and Responsibilities

Maroochy State High School;

- recognises the importance of students receiving a broad-based education, comprising both general and vocational education and training
- will provide the teachers and equipment to run courses. If the school loses access to these resources, it will provide students with alternative opportunities to complete the course and the related qualification. The school retains the right to cancel the course if it is unable to meet requirements. If a student enrolls late into a Vocational Education and Training course, that student may not complete all competencies to enable them to attain the full qualification. If this is the case, the student will receive a Statement of Attainment outlining the competencies they have completed.
- has a process in place that enables students to apply for Recognition of Prior Learning (RPL) for the vocational education competencies (refer to the VET Student handbook for further information)
- has a process for addressing any concerns a student may have and offers the students access to a range of people who can provide advice and guidance about the vocational education program.

Maroochy State High School has a complaints and appeals policy specific to the RTO operations:

A complaint can be made to the school Registered Training Organisation (RTO) regarding the conduct of Maroochy State High School, its trainers, assessors or other school RTO staff; students of Maroochy State High School; any third parties providing services on behalf of Maroochy State High School (if relevant)

An appeal can be made to Maroochy State High School to request a review of a decision, including assessment decisions.

Maroochydhore State High School will ensure that the principles of natural justice and procedural fairness are adopted at every stage of the complaints and appeals process. All formal complaints and appeals will be heard and decided on within 60 calendar days of receiving the written complaint or appeal. If Maroochydhore State High School considers more than 60 calendar days are required to process and finalise the complaint or appeal, the complainant or appellant will be informed of the reasons in writing and will be regularly updated on the progress of the matter.

If the processes fail to resolve the complaint or appeal, a review by an independent party will be provided if requested.

Complaints or appeals should be directed to the principal as CEO of Maroochydhore State High School admin@maroochydhorehs.eq.edu.au. Refer to complaints and appeals policy and procedure document for further information.

Students are asked to:

- refer to the Curriculum handbook / website and
- partake in VET induction sessions.

Enrolment and Admission

Access to VET Certificates is open to all students, regardless of race, gender and ability. Subjects will be offered if enrolment numbers are viable and human and physical resources comply with VQF standards.

Fees

Subject charges vary according to individual Certificate requirements – refer to individual course information outline in this booklet, VET Offerings and VETiS Funding forms. If a student withdraws from a course where Maroochydhore State High School is the registered training provider, a pro-rata refund policy applies. Where students are undertaking a course provided by an external registered training provider, students and parents should carefully read their refund policy as outlined in each course description.

Refer to the VET documentation located on the School Website: www.maroochydhorehs.eq.edu.au

School Based- Apprenticeship and Traineeships (SAT)

School-based apprentices and trainees, typically in Years 10, 11 and 12, are trained in the workplace and with a training organisation, in their chosen apprenticeship or traineeship while continuing to study towards their QCE or QCIA.

To commence a SAT, a student must have the support of the employer, the school, supervising registered training organisation and their parent/guardian.

The employer, student and parent/guardian (if applicable and appropriate) will be required to sign a training contract with the assistance of an Australian Apprenticeship Support Network [AASN] provider agreeing to work together for the length of the apprenticeship or traineeship.

It is anticipated that, prior to lodging the training contract for registration, the AASN provider will ensure that the parties to the contract work together and with the parent or guardian and the school, to negotiate a schedule of education, training and employment (ETES). There must be some impact on the student's school timetable for the program to be considered school-based and this schedule will show that impact.

Please contact the Vocational Liaison Officer on 5409 7333 for further information or go to the website <http://apprenticeshipinfo.qld.gov.au>

Senior students – what you need to know

The new senior assessment and tertiary entrance system (or New QCE) means there has been a change to the way curriculum is delivered. School routines, student workload and expectations are now very different compared to those experienced by senior students in the OP system.

Time Management and assessment workload

In the new QCE system, students are no longer working towards a traditional end of term exam block. While the number of assessment items for General and Applied subjects has been reduced, the timing of this assessment will be different for each subject. Work is also blocked into Units (Unit 1, 2, 3, 4) which run across holiday periods. As a result, students will notice they may be preparing for assessment at non-traditional times (for example, very early in the term) or their peak workload time is different to other students, due to individualised learning programs.

Assessment attendance and exam blocks

- Exam assessment will be completed on student flexible learning days unless students are otherwise advised. Students are required to attend these sessions unless an AARA (Access Arrangement and Reasonable Adjustment) has been approved. Should a clash with TAFE, traineeship or other external learning provider arise, students are expected to make alternative arrangements with their trainers or employers.
- Exam Blocks (Year 11). At least one exam block will occur during Week 3 of Term 4.
- Exam Blocks (Year 12). A MSHS mock exam block will occur during Week 10 of Term 3 (attendance is compulsory). QCAA External Assessment will occur during Weeks 4-7 of Term 4
- VET competency catch-up lessons run during exam blocks. Student attendance is compulsory, unless otherwise advised.
- Mock Exams: Sample external assessment instruments are available on the QCAA website. These demonstrate one possible format for an external assessment item for each subject and assess learning in Units 3 & 4.
- Studying to the mock exam will not guarantee success as they have been designed for demonstration purposes only

Subject changes

Subject changes between General subjects during Year 11 and 12 should be avoided, where possible, as these can significantly disrupt the students learning program and/or successful completion of the QCE qualification. If a student would like to change subjects, they will need to meet with a senior school staff member or guidance officer to discuss options. An appointment can be made via the Office.

Academic Integrity & Misconduct

Academic integrity requires academic responsibilities to be approached in an honest, moral and ethical way. Schools, teachers, parents/carers and others who support students in their learning have responsibility for promoting and maintaining academic integrity.

Academic misconduct incorporates a broad range of behaviours by which students inappropriately and falsely demonstrate their learning. If a student is found to engage in academic misconduct, the school's school assessment policy will guide consequences which can include suspension and/or loss of credit and QCE attainment.

Examples of academic misconduct include (but are not limited to);

- Cheating while under supervised conditions
- Collusion
- Contract cheating
- Copying work
- Disclosing or receiving information about an assessment
- Fabricating
- Impersonation
- Misconduct during an examination
- Plagiarism or lack of referencing
- Self plagiarism-
- Significant contribution of help

To ensure students and parents/carers understand the important concept of Academic Integrity, the QCAA has created an online course which all families can access through the MyQCE website
<https://myqce.qcaa.qld.edu.au/>

Access Arrangements and Reasonable Adjustments (AARA) - a brief overview

AARA's are provided to minimise barriers for a student whose disability, impairment, medical condition or other circumstances may affect their ability to read, respond to or participate in assessment. Students are NOT eligible for AARA or extension to due dates when matters arise from the student's or parent's/carer's own choosing (eg family holidays), as per the QCE and QCIA policy and procedures handbook section 6.3.2 Ineligibility. To align with QCAA policy, Principal Exemptions for School Absence for Year 11 and 12 students will not be approved. If holidays are taken by the family and requirements of the course are not met, students may compromise their qualification and/or be given the option to complete their QCE over a three year- period.

In situations where students experience disability, impairment, a medical condition or other barrier which may affect their assessment participation, the school will work with the student and their families to create reasonable assessment adjustments. Students will need to produce a medical certificate if an extension to assessment due date is required due to injury/illness. Refer to the school's assessment policy for further information or make an appointment to see a senior school staff member or guidance officer via the Office.

Year 10 Pre-requisites required for Senior Subjects

The Year 10 curriculum has been designed to create a strong learning foundation for students coming into Year 11 subjects. As a result, students must meet Year 10 curriculum pre-requisites to be considered for enrolment in senior subjects. Students new to Maroochydore State High School will meet with the Deputy Principal or senior school staff member during their enrolment interview to discuss transfer pathways. Refer to the Year 10 Pre-requisites for Senior Subjects list for a complete overview.

General Mathematics

General

General senior subject

General Mathematics is designed to equip students with mathematical skills to meet their needs in their future studies or employment. General Mathematics focuses on practical skills of Number, Measurement, Geometry and statistics coupled with an exploration of algebra, networks and matrices which have many applications in business, logistics and management.

Pathways

General Mathematics can establish a basis for further education and employment in the fields of business, commerce, education, finance, IT, social science and the arts. General Mathematics will also provide a solid foundation for future careers in a trade.

Objectives

By the conclusion of the course of study, students will:

- recall mathematical knowledge
- use mathematical knowledge
- communicate mathematical knowledge
- evaluate the reasonableness of solutions
- justify procedures and decisions
- solve mathematical problems.

Pre-requisites

Obtain a minimum B level of achievement in Year 10 General Mathematics or HOD approval.

Special Requirements

- Scientific Calculator
- Hire of e-textbook
- Casio Fx-82AU II - Plus 2nd edition (other calculators may not meet subject requirements)
- Two exercise books
- Ruler
- BYO Laptop and internet access

Structure

Unit 1	Unit 2	Unit 3	Unit 4
Money, measurement, algebra and linear equations <ul style="list-style-type: none"> • Consumer arithmetic • Shape and measurement • Similarity and scale • Algebra • Linear equations and their graphs 	Applications of linear equations and trigonometry, matrices and univariate data analysis <ul style="list-style-type: none"> • Applications of linear equations and their graphs • Applications of trigonometry • Matrices • Univariate data analysis 1 • Univariate data analysis 2 	Bivariate data and time series analysis, sequences and Earth geometry <ul style="list-style-type: none"> • Bivariate data analysis 1 • Bivariate data analysis 2 • Time series analysis • Growth and decay in sequences • Earth geometry and time zones 	Investing and networking <ul style="list-style-type: none"> • Loans, investments and annuities 1 • Loans, investments and annuities 2 • Graphs and networks • Networks and decision mathematics 1 • Networks and decision mathematics 2

Assessment: In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A-E).

Unit 3		Unit 4

<ul style="list-style-type: none">Examination — combination response			

Mathematical Methods

General

General senior subject

Mathematical Methods is designed to equip students with skills to solve complex mathematical problems encountered in many engineering, science and commerce situations. Students undertaking the course have a strong background in algebra and graphing and are considering tertiary education.

Pathways

Mathematical Methods is a common pre-requisite in the fields of natural and physical sciences (especially physics and chemistry), mathematics, computer science, engineering, business, medical and health sciences.

Objectives

By the conclusion of the course of study, students will:

- recall mathematical knowledge
- use mathematical knowledge
- communicate mathematical knowledge

Structure

- evaluate the reasonableness of solutions
- justify procedures and decisions
- solve mathematical problems.

Pre-requisites

Obtain a minimum B level of achievement in Year 10 Mathematical Methods and a high level of confidence in algebra.

Special Requirements

- Recommended completion of Year 10 Specialist mathematics elective
- Graphics Calculator TI-84+ - Hired from Resource Centre
- Two exercise books
- Hire charge for e-text
- BYO Laptop and internet access

Unit 1	Unit 2	Unit 3	Unit 4
Surds, algebra, functions and probability <ul style="list-style-type: none"> • Surds and quadratic functions • Binomial expansion and cubic functions • Functions and relations • Trigonometric functions • Probability 	Calculus and further functions <ul style="list-style-type: none"> • Exponential functions • Logarithms and logarithmic functions • Introduction to differential calculus • Applications of differential calculus • Further differentiation 	Further calculus and introduction to statistics <ul style="list-style-type: none"> • Differentiation of exponential and logarithmic functions • Differentiation of trigonometric functions and differentiation rules • Further applications of differentiation • Introduction to integration • Discrete random variables 	Further calculus, trigonometry and statistics <ul style="list-style-type: none"> • Further integration • Trigonometry • Continuous random variables and the normal distribution • Sampling and proportions • Interval estimates for proportions

Assessment: In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): 20% Problem-solving and modelling task			
Summative internal assessment 2 (IA2): <ul style="list-style-type: none">Examination — short response	15%	Summative internal assessment 3 (IA3): <ul style="list-style-type: none">Examination — short response	15%
Summative external assessment (EA): 50% <ul style="list-style-type: none">Examination — combination response			

Specialist Mathematics

General

General senior subject

Specialist Mathematics is designed for students who have a passion for mathematics and who seek to extend their knowledge. Specialist mathematics builds on the topics taught in Mathematical Methods to allow a greater sophistication of modelling problems.

Pathways

A course of study in Specialist Mathematics can establish a basis for further education and employment in the fields of science, all branches of mathematics and statistics, computer science, medicine, engineering, finance and economics.

Objectives

By the conclusion of the course of study, students will:

- recall mathematical knowledge
- use mathematical knowledge
- communicate mathematical knowledge

- evaluate the reasonableness of solutions
- justify procedures and decisions
- solve mathematical problems.

Pre-requisites

- Obtain a minimum B level of achievement in Year 10 Mathematical Methods
- Preferred study in Year 10 Specialist Maths

Special Requirements

- Specialist Mathematics is to be undertaken in conjunction with, or on completion of, Mathematical Methods.
- Graphics Calculator TI-84+ - Hired from Resource Centre
- BYO Laptop and internet access
- Hire of e-text - Two exercise books

Structure:

Essential Mathematics

Applied

Applied senior subject

Essential Mathematics is designed to build student confidence in using mathematical skills in their everyday life. Essential Mathematics has an emphasis using the concepts of number, money, data, measurement and graphing in practical situations.

Pathways

A course of study in Essential Mathematics promotes general employment and successful participation in society.

Objectives

By the conclusion of the course of study, students will:

- recall mathematical knowledge
- use mathematical knowledge
- communicate mathematical knowledge
- evaluate the reasonableness of solutions
- justify procedures and decisions
- solve mathematical problems.

Pre-requisites

This course will suit students who have completed Year 10 Essential Mathematics and have had past difficulties in mathematics

Special Requirements

- Scientific Calculator Casio Fx-82AU II Plus 2nd edition
- Two exercise books
- Ruler
- Photocopying fee for booklet
- Access to E book
- BYO Laptop and internet access

Structure

Unit 1	Unit 2	Unit 3	Unit 4

Short Course Subject

Numeracy Short Course is designed to equip students to gain mathematical knowledge and understanding, mathematical problem-solving skills, literacy skills and positive beliefs and attitudes.

Pathways

This Short Course in Numeracy is a one-unit course of study, developed to meet a specific curriculum need. Results in Numeracy do not contribute to an Australian Tertiary Admission Rank (ATAR) calculation.

Objectives

By the conclusion of the course of study, students will:

- select and interpret mathematical information
- select from and use a variety of developing mathematical and problem-solving strategies
- use oral and written mathematical language and representation to communicate mathematically
- plan, implement and adjust processes to achieve learning outcomes
- apply learning strategies.

Pre-requisites

Nil

Special Requirements

- Scientific Calculator Casio Fx-82AU II Plus 2nd edition
- Two exercise books
- Ruler
- Photocopying fee for booklet
- BYO Laptop and internet access

Structure

Unit 1

Topic 1: Personal identity and education

In Topic 1, students develop numeracy and learning skills in the contexts of expressing personal identity, achieving personal goals, and understanding and interacting with the wider community.

Students use mathematics to make sense of the world and learn to apply mathematics in a context for a social purpose. They learn to apply numeracy skills and mathematics in structured learning situations, whether learning towards a formal qualification, learning within a community-based program, or formal or informal on-the-job learning and training.

Topic 2: The work environment

In Topic 2, students develop their skills of numeracy and learning through activities that relate to preparing for and seeking employment, operating in an existing workplace, and/or entering a new work environment. They use mathematics to deal with situations in the work environment that involve the use and application of a range of mathematical skills and knowledge.

Assessment:

Unit 1

Topic 1: Personal identity and education

The assessment for this topic consists of two parts:

- an extended response — oral mathematical presentation (Internal assessment 1A)
- a student learning journal (Internal assessment 1B).

Topic 2: The work environment

The assessment for this topic consists of two parts:

- an examination — short response (Internal assessment 2A)
- a student learning journal (Internal assessment 2B).

General senior subject

Senior English focuses on the study of both literary texts and non-literary texts, developing students as independent, innovative and creative learners and thinkers.

Learners use language, analyse perspectives and evidence, and challenge ideas and varying interpretations with diverse text.

Pathways

The English Course promotes open-mindedness, imagination, critical awareness and intellectual flexibility - skills that prepare students for 21st Century and lifelong learning across different context.

Objectives

By the conclusion of the course of study, students will:

- use patterns and conventions of genres to achieve particular purposes in cultural contexts and social situations
- establish and maintain roles of the writer/speaker/signer/designer and relationships with audiences

- create and analyse perspectives and representations of concepts, identities, times and places
- make use of and analyse the ways cultural assumptions, attitudes, values and beliefs underpin texts and invite audiences to take up positions
- use aesthetic features and stylistic devices to achieve purposes and analyse their effects in texts
- select and synthesise subject matter to support perspectives
- organise and sequence subject matter to achieve particular purposes
- use cohesive devices to emphasise ideas and connect parts of texts. Make language choices for particular purposes and contexts
- use grammar and language structures for particular purposes and use mode-appropriate features to achieve particular purposes.

Pre-requisites

- Obtain a minimum C level of achievement in Year 10 English

Special Requirements

- BYO Laptop.
- 16GB USB/storage

Structure

Unit 1	Unit 2	Unit 3	Unit 4
Perspectives and texts <ul style="list-style-type: none"> • Examining and creating perspectives in texts • Responding to a variety of non-literary and literary texts • Creating responses for public audiences and persuasive texts 	Texts and culture <ul style="list-style-type: none"> • Examining and shaping representations of culture in texts • Responding to literary and non-literary texts, including a focus on Australian texts • Creating imaginative and analytical texts 	Textual connections <ul style="list-style-type: none"> • Exploring connections between texts • Examining different perspectives of the same issue in texts and shaping own perspectives • Creating responses for public audiences and persuasive texts 	Close study of literary texts <ul style="list-style-type: none"> • Engaging with literary texts from diverse times and places • Responding to literary texts creatively and critically • Creating imaginative and analytical texts

Assessment: In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will receive an overall subject result (A-E). Units 1 and 2 (Year 11) mirror the Unit 3 and 4 assessment tasks using different texts.

Unit 3		Unit 4	
Summative internal assessment 1 (IA1):	25%	Summative internal assessment 3 (IA3):	25%
<ul style="list-style-type: none"> • Extended response — written response for a public audience 		<ul style="list-style-type: none"> • Extended response — imaginative written response 	
Summative internal assessment 2 (IA2):	25%	Summative external assessment (EA):	25%
<ul style="list-style-type: none"> • Extended response — persuasive spoken response 		<ul style="list-style-type: none"> • Examination — analytical written response 	

Applied senior subject

Essential English develops and refines students' understanding of language, literature and literacy to enable them to interact confidently and effectively with others. They continue to build skills to understand, accept and challenge the values/attitudes in texts.

Pathways

The Essential English Course promotes open-mindedness, imagination, critical awareness — skills with Vocational and/or ATAR Pathways.

Objectives

By the conclusion of the course of study, students will:

- use patterns and conventions of genres to suit particular purposes and audiences
- use appropriate roles and relationships with audiences
- construct and explain representations of identities, places, events and/or concepts

- make use of and explain opinions and/or ideas in texts, according to purpose
- explain how language features and text structures shape meaning and invite particular responses
- select and use subject matter to support perspectives
- sequence subject matter and use mode-appropriate cohesive devices to construct coherent texts
- make mode-appropriate language choices according to register informed by purpose, audience and context
- use language features to achieve particular purposes across modes.

Pre-requisites

Nil

Special Requirements

- BYO Laptop and 16GB storage.

Structure

Unit 1	Unit 2	Unit 3	Unit 4
Language that works <ul style="list-style-type: none"> • Responding to a variety of texts • Creating texts 	Texts and human experiences <ul style="list-style-type: none"> • Responding to texts • Creating texts 	Language that influences <ul style="list-style-type: none"> • Creating and shaping perspectives on community, local and global issues in texts • Responding to texts that seek to influence audiences 	Representations and popular culture texts <ul style="list-style-type: none"> • Responding to popular culture texts • Creating representations of Australian identities, places, events and concepts

Assessment: Schools devise assessments in Units 1 and 2 to suit their local context. In Units 3 and 4 students complete four summative assessments. Schools develop three summative internal assessments and the common internal assessment (CIA) is developed by the QCAA.

Unit 3	Unit 4
Summative internal assessment 1 (IA1): <ul style="list-style-type: none"> • Spoken response 	Summative internal assessment 3 (IA3): <ul style="list-style-type: none"> • Multimodal response

English and Literature Extension

General

General senior subject

English & Literature Extension is an extension of both the English and the Literature syllabuses and should read in conjunction with those syllabuses. To study English & Literature Extension, students should have completed Units 1 and 2 of English. In Year 12, students undertake Unit 3 and 4 of English & Literature Extension concurrently with Units 3 and 4 of English. The English & Literature Extension course offers more challenge than other English courses and builds on the literature study students have already undertaken.

By offering students the opportunity to specialise in the theorised study of literature, English & Literature Extension provides students with ways they might understand themselves and the potential that literature has to expand the scope of their experiences. The subject assists students to ask critical questions about cultural assumptions, implicit values and differing world views encountered in an exploration of social, cultural and textual understandings about literary texts and the ways they might be interpreted and valued.

Pathways

A course of study in English & Literature Extension can establish a basis for further education and employment in a range of fields, and can lead to a range of careers in areas, where understanding social, cultural and textual influences on ways of viewing the world is a key element, such as law, journalism, media, arts, curating, education, policy and human resources. It also provides a good introduction to the academic disciplines and fields of study that involve the application of methodologies based on theoretical understandings.

Structure To study English & Literature Extension, students should have completed Units 1 and 2 of English. In Year 12, students undertake Units 3 and 4 of English & Literature Extension concurrently with Units 3 and 4 of English

Unit 3	Unit 4
Ways of reading <ul style="list-style-type: none">• Readings and defences• Defence of complex transformation	Exploration and evaluation <ul style="list-style-type: none">• Extended academic research paper• Theorised exploration of texts

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): <ul style="list-style-type: none">• Reading and defence	20%	Summative internal assessment 3 (IA3): <ul style="list-style-type: none">• Academic research paper	35%
Summative internal assessment 2 (IA2): <ul style="list-style-type: none">• Defence of a complex transformation	20%	Summative external assessment (EA): <ul style="list-style-type: none">• Examination — extended response	25%

Objectives

By the conclusion of the course of study, students will:

- demonstrate understanding of literary texts studied to develop interpretation/s
- demonstrate understanding of different theoretical approaches to exploring meaning in texts
- demonstrate understanding of the relationships among theoretical approaches
- apply different theoretical approaches to literary texts to develop and examine interpretations
- analyse how different genres, structures and textual features of literary texts support different interpretations
- use appropriate patterns and conventions of academic genres and communication, including correct terminology, citation and referencing conventions
- use textual features in extended analytical responses to create desired effects for specific audiences
- evaluate interpretations of literary texts, making explicit theoretical approaches that underpin them
- synthesise analysis of literary texts, theoretical approaches and interpretations with supporting evidence.

Pre-requisites

- Obtain an A level of achievement in Year 11 English

Special Requirements

- BYO Laptop and 16GB storage.

Literacy Short Course

Literacy Short Course focuses on aspects of literacy. Effective literacy is intrinsically purposeful, flexible and dynamic, and involves the integration of speaking, listening and critical thinking with reading and writing.

This Short Course in Literacy is a one-unit course, developed to meet a specific curriculum need. Results in Literacy do not contribute to an Australian Tertiary Admission Rank (ATAR) calculation.

Pathways

Literacy is a Short Course suited to students who are interested in pathways beyond school that lead to vocational education and/or work. A course of study in Literacy may establish a basis for further education and employment in the fields of trade, industry, business and community services.

Students will learn within a practical context related to general employment and successful participation in society, drawing on the literacy used by various professional and industry groups.

Objectives

By the conclusion of the course of study, students will:

- evaluate and integrate information and ideas to construct meaning from texts and text types
- select and apply reading strategies that are appropriate to purpose and text type
- communicate relationships between ideas and information in a style appropriate to audience and purpose
- select vocabulary, grammatical structures and conventions that are appropriate to the text
- select and use appropriate strategies to establish and maintain spoken communication
- derive meaning from a range of oral texts
- plan, implement and adjust processes to achieve learning outcomes
- apply learning strategies.

Pre-requisites

Nil

Special Requirements

- BYO Laptop and 16GB storage.
- Two exercise books

Structure

Unit 1	
Topic 1 <ul style="list-style-type: none"> • In Topic 1, students develop reading, writing, oral communication and learning skills through expressing personal identity, achieving personal goals, and understanding and interacting with the wider community. 	Topic 2 <ul style="list-style-type: none"> • In Topic 2, students develop reading, writing, oral communication and learning skills through activities that relate to preparing for and seeking employment, operating in an existing workplace, and/or entering a new work environment.

Assessment: Students will complete two summative internal assessments that count towards their overall subject result. Students will receive an overall subject result (A-E)

Unit 1
Topic 1: Personal identity and education The assessment for this topic consists of two parts: <ul style="list-style-type: none"> • an extended response — written (Internal assessment 1A) • a student learning journal (Internal assessment 1B)
Topic 2: The work environment The assessment for this topic consists of two parts: <ul style="list-style-type: none"> • an extended response — spoken/signed (Internal assessment 2A) • a reading comprehension task (Internal assessment 2B).

General senior subject

Modern History is a discipline based- subject where students examine traces of humanity's recent past so they may form their own views about the Modern World. Through Modern History, students' curiosity and imagination is invigorated while their appreciation of civilisation is broadened and deepened. Students learn that the past is contestable and tentative. They discover how the past consists of various perspectives and interpretations.

Pathways

Study of Modern History can lead to employment in the fields of history, education, psychology, law, business, economics, politics, journalism, the media, health and social sciences. Modern History also can be studied for enjoyment.

Objectives

By the conclusion of the course of study, students will:

- comprehend terms, issues and concepts
- devise historical questions and conduct research
- analyse historical sources and evidence
- synthesise information from historical sources and evidence
- evaluate historical interpretations
- create responses that communicate meaning.

Pre-requisites

To gain the most out of this course, students should obtain a minimum C level of achievement in Year 10 Humanities (Sem 1) and/or History (Sem 2) and Year 10 English.

Special Requirements

- Access to Laptop / Excursion to University Queensland.

Structure (Teacher selects two topics from each unit to study)

Unit 1	Unit 2	Unit 3	Unit 4
Ideas in the Modern world <ul style="list-style-type: none"> • Australian Frontier Wars, 1788-1930s • Age of Enlightenment, 1750s-1789 • Industrial Revolution, 1760s-1890s • American Revolution, 1763-1783 • French Revolution, 1789-1799 • Age of Imperialism, 1848-1914 • Meiji Restoration, 1868-1912 • Boxer Rebellion and its aftermath, 1900-1911 • Russian Revolution, 1905-1920s • Xinhai Revolution and its aftermath 1911-1912 • Iranian Revolution and its aftermath, 1977-1979 • Arab Spring since 2010 • Alternative topic for Unit 1. 	Movements in the Modern World <ul style="list-style-type: none"> • Empowerment of First Nations since 1938 • Independence movement in India, 1857-1947 • Workers' movement since the 1860s • Women's movement since 1893 • May Fourth Movement in China, 1919 • Independence movement in Algeria, 1945-1962 • Independence movement in Vietnam, 1945-1975 • Anti-apartheid movement in South Africa, 1948-1991 • African American- civil rights movement, since 1954 • Environmental movement since 1960s • LGBTIQ civil rights movement since 1969 • Pro-democracy movement in Myanmar (Burma) • Alternative topic for Unit 2. 	National Experiences in the Modern world <ul style="list-style-type: none"> • Australia since 1901 • United Kingdom since 1901 (Edwardian Era begins) • France, 1799–1815 • New Zealand since 1841 • Germany since 1914 • United States of America, 1917-1945 • Soviet Union, 1920s-1945 • Japan since 1931 • China since 1931 • Indonesia since 1942 • India since 1947 • Israel since 1917 • South Korea since 1948 	International Experiences in the Modern World <ul style="list-style-type: none"> • Australian engagement with Asia since 1945 • Search for collective peace and security since 1815 • Trade and commerce between nations since 1833 • Mass migrations since 1848 • Information Age since 1936 • Genocides and ethnic cleansings since the 1930s • Nuclear Age since 1945 • Cold War and its aftermath 1945-2014 • Struggle for peace in the Middle East since 1948 • Cultural globalisation since 1956 • Space exploration since 1950s • Rights and recognition of First Peoples since 1982 • Terrorism, anti-terrorism and counter-terrorism since 1984 <p>QCAA will nominate one of these topics to become the basis for an external examination.</p>

Assessment: Schools devise assessments in Units 1 and 2 to suit their local context. In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A-E).

Unit 3		Unit 4	
Summative internal assessment 1 (IA1):	25%	Summative internal assessment 3 (IA3):	25%
<ul style="list-style-type: none"> • Examination — essay in response to historical sources 		<ul style="list-style-type: none"> • Investigation — historical essay based on research 	
Summative internal assessment 2 (IA2):	25%	Summative external assessment (EA):	25%
<ul style="list-style-type: none"> • Independent source investigation 		<ul style="list-style-type: none"> • Examination — short responses to historical sources 	

General senior subject

Ancient History is concerned with studying people, societies and civilisations of the past, from the development of the earliest human communities to the end of the Middle Ages. Ancient History shows how modern society has its origins in the Ancient World of Greece and Rome.

Pathways

Study of Ancient History can lead to employment in the fields of archaeology, history, education, psychology, law, business, economics, politics, journalism, the media, health and social sciences. Ancient History also can be studied for enjoyment.

Objectives

By the conclusion of the course of study, students will:

- comprehend terms, issues and concepts
- devise historical questions and conduct research
- analyse historical sources and evidence
- synthesise information from historical sources and evidence
- evaluate evidence from historical sources
- communicate to suit purpose

Pre-requisites

To gain the most out of this course, students should obtain a minimum C level of achievement in Year 10 Humanities (Sem 1) and/or History (Sem 2) and Year 10 English.

Special Requirements

- Access to Laptop / Excursion to University Queensland.

Structure (Teacher selects *two* topics from each unit to study)

Unit 1	Unit 2	Unit 3	Unit 4
Investigating the ancient world <ul style="list-style-type: none"> • Digging up the past • Features in ancient society 	Personalities in their time <ul style="list-style-type: none"> • Personality from the Ancient World 1 • Personality from the Ancient World 2 	Reconstructing the ancient world <ul style="list-style-type: none"> • Thebes — East and West, 18th to 20th Dynasty Egypt • The Bronze Age Aegean • Assyria from Tiglath Pileser III to the fall of the Empire • The Ancient Levant – First and Second Temple Period • Persia from Cyrus II to Darius III • Fifth Century Athens (BCE) • Macedonian Empire from Philip II to Alexander III • Early Imperial Rome from Augustus to Nero • Pompeii and Herculaneum • Later Han Dynasty and the Three Kingdoms • The Celts and or Romain Britain • The Medieval Crusades • Classical Japan until the end of the Heian Period 	People, power and authority <ul style="list-style-type: none"> • Schools choose one study of power from: <ul style="list-style-type: none"> • Ancient Egypt — New Kingdom Imperialism • Ancient Greece — the Persian Wars — the Peloponnesian War • Ancient Rome/ and or Rome — the Punic Wars • Ancient Rome — Civil War and the breakdown of the Republic • The Augustan Age • Imperial Rome until the fall of the Western Roman Empire • The Byzantine Empire • Schools select one of the personality options that has been nominated by the QCAA for the external assessment. Schools will be notified of the options at least two years before the external assessment is implemented.

Assessment: Schools devise assessments in Units 1 and 2 to suit their local context. In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A-E).

Unit 3		Unit 4	
Summative internal assessment 1 (IA1):	25%	Summative internal assessment 3 (IA3):	25%
<ul style="list-style-type: none"> • Examination — essay in response to historical sources 		<ul style="list-style-type: none"> • Investigation — historical essay based on research 	
Summative internal assessment 2 (IA2):	25%	Summative external assessment (EA):	25%
<ul style="list-style-type: none"> • Independent source investigation 		<ul style="list-style-type: none"> • Examination — short responses to historical sources 	

General senior subject

Legal Studies focuses on the interaction between society and the discipline of law and explores the role and development of law in response to current issues. Students study the legal system and how it regulates activities and aims to protect the rights of individuals, while balancing these with obligations and responsibilities.

Pathways

A course of study in Legal Studies can establish a basis for further education and employment in the fields of law, law enforcement, criminology, justice studies and politics.

Objectives

By the conclusion of the course of study, students will:

- comprehend legal concepts, principles and processes
- select legal information from sources
- analyse legal issues
- evaluate legal situations
- create responses that communicate meaning.

Pre-requisites

Obtain a minimum C level of achievement in Year 10 English or Humanities. There is no requirement for students to have studied Business subjects in Years 9 or 10.

Special Requirements

- BYOd Laptop with internet access

Structure

Unit 1	Unit 2	Unit 3	Unit 4
Beyond reasonable doubt <ul style="list-style-type: none"> • Legal foundations • Criminal investigation process • Criminal trial process • Punishment and sentencing 	Balance of probabilities <ul style="list-style-type: none"> • Civil law foundations • Contractual obligations • Negligence and the duty of care 	Law, governance and change <ul style="list-style-type: none"> • Governance in Australia • Law reform within a dynamic society 	Human rights in legal contexts <ul style="list-style-type: none"> • Human rights • Australia's Legal response to International Law • Human rights in Australian contexts

Assessment: In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A-E).

Unit 3		Unit 4	
Summative internal assessment 1 (IA1):	25%	Summative internal assessment 3 (IA3):	25%
<ul style="list-style-type: none"> • Examination — combination response 		<ul style="list-style-type: none"> • Investigation — analytical essay 	
Summative internal assessment 2 (IA2):	25%	Summative external assessment (EA):	25%
<ul style="list-style-type: none"> • Investigation — inquiry report 		<ul style="list-style-type: none"> • Examination — combination response 	

Applied senior subject

Engineering Skills focuses on the underpinning industry practices and production processes. Students gain an understanding of technical information and safe practical production processes. Students develop transferable skills by engaging in manufacturing tasks that relate to business and industry.

Pathways

A course of study in Engineering Skills can establish a basis for further education and employment in engineering trades. Employment opportunities may be found, as a sheet metal worker, metal fabricator, welder, maintenance fitter, metal machinist.

Objectives

By the conclusion of the course of study, students should:

- demonstrate practices, skills and procedures
- interpret drawings and technical information
- select practices, skills and procedures
- sequence processes
- evaluate skills and procedures, and structures
- adapt plans, skills and procedures.

Pre-requisites

Nil

Special Requirements

Ability to meet safe work requirements

Structure

The Engineering Skills course is four-unit course of study.

Unit option	Unit title
Unit option A	Fitting and machining
Unit option B	Welding and fabrication
Unit option C	Sheet metal working
Unit option D	Production in the structural engineering industry

Assessment

Students complete two assessment tasks for each unit. The assessment techniques used in Engineering Skills are:

Technique	Description	Response requirements
Practical demonstration	Students perform a practical demonstration when manufacturing a unit context artefact and reflect on industry practices, and production skills and procedures.	Practical demonstration Practical demonstration: the skills and procedures used in 3–5 production processes Documentation Multimodal (at least two modes delivered at the same time): up to 3 minutes, 6 A4 pages, or equivalent digital media
Project	Students manufacture a unit context product that consists of multiple interconnected components and document the manufacturing process.	Product Product: 1 unit-specific product manufactured using the skills and procedures in 5–7 production processes Manufacturing process Multimodal (at least two modes delivered at the same time): up to 5 minutes, 8 A4 pages, or equivalent digital media

Applied senior subject

Furnishing Skills focuses on the underpinning industry practices and production processes required to manufacture furnishing products with high aesthetic qualities. Students develop transferable skills by engaging in manufacturing tasks that relate to business and industry.

Pathways

A course of study in Furnishing Skills can establish a basis for further education and employment in the furnishing industry. Employment opportunities may be found in furnishing trades as, for example, a furniture-maker, wood machinist, cabinet-maker, upholsterer, furniture restorer.

Objectives

By the conclusion of the course of study, students should:

- demonstrate practices, skills and procedures
- interpret drawings and technical information
- select practices, skills and procedures.
- sequence processes
- evaluate skills and procedures, and products
- adapt plans, skills and procedures.

Pre-requisites

Nil

Special Requirements

Ability to meet safe work requirements

Structure

The Furnishing Skills course is designed around core and elective topics.

Unit option	Unit title
Unit option A	Furniture-making
Unit option B	Cabinet-making
Unit option C	Interior furnishing
Unit option D	Production in the domestic furniture industry

Assessment

For Furnishing Skills, student complete two assessment tasks for each unit. The assessment techniques used are:

Technique	Description	Response requirements
Practical demonstration	Students perform a practical demonstration when manufacturing a unit context artefact and reflect on industry practices, and production skills and procedures.	Practical demonstration Practical demonstration: the skills and procedures used in 3–5 production processes Documentation Multimodal (at least two modes delivered at the same time): up to 3 minutes, 6 A4 pages, or equivalent digital media
Project	Students manufacture a product and document the manufacturing process.	Product Product: 1 unit-specific product manufactured using the skills and procedures in 5–7 production processes Manufacturing process Multimodal (at least two modes delivered at the same time): up to 5 minutes, 8 A4 pages, or equivalent digital media

General senior subject

Digital Solutions enables students to learn about algorithms, computer languages and user interfaces through generating digital solutions to problems. Students engage with data, information and applications to create digital solutions that filter and present data in timely and efficient ways. The course utilises a video game development perspective to enable students to develop these skills

Pathways

A course of study in Digital Solutions can establish a basis for further education and employment in the fields of science, technologies, engineering and mathematics.

Objectives

By the conclusion of the course of study, students will:

- recognise and describe elements, components, principles and processes
- symbolise and explain information, ideas and interrelationships
- analyse problems and information
- determine solution requirements and criteria
- synthesise information and ideas to determine possible digital solutions
- generate components of the digital solution
- evaluate impacts, components and solutions against criteria to make refinements and justified recommendations
- make decisions about and use mode-appropriate features, language and conventions for particular purposes and contexts.

Pre-requisites

Obtain a minimum C level of achievement in English.

Special Requirements

- An 8GB USB Drive
- Students will be required to have access to modern computers outside the classroom (eg student BYO laptop or home computer etc.)

Structure

Unit 1	Unit 2	Unit 3	Unit 4
Creating with code <ul style="list-style-type: none"> • Understanding digital problems • User experiences and interfaces • Algorithms and programming techniques • Programmed solutions 	Application and data solutions <ul style="list-style-type: none"> • Data driven- problems and solution requirements • Data and programming techniques • Prototype data solutions 	Digital innovation <ul style="list-style-type: none"> • Interactions between users, data and digital systems • Real-world- problems and solution requirements • Innovative digital solutions 	Digital impacts <ul style="list-style-type: none"> • Digital methods for exchanging data • Complex digital data exchange problems and solution requirements • Prototype digital data exchanges

Assessment: In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A-E).

Unit 3		Unit 4	
Summative internal assessment 1 (IA1):	25%	Summative internal assessment 3 (IA3):	25%
<ul style="list-style-type: none"> • Technical proposal 		<ul style="list-style-type: none"> • Digital solution 	
Summative internal assessment 2 (IA2):	25%	Summative external assessment (EA):	25%
<ul style="list-style-type: none"> • Digital solution 		<ul style="list-style-type: none"> • Examination – combined response 	

General senior subject

Physical Education provides students with knowledge, understanding and skills to explore and enhance their own and others' health and physical activity in diverse and changing contexts.

Physical Education provides a philosophical and educative framework to promote deep learning in three dimensions: about, through and in physical activity contexts. Students optimise their engagement and performance in physical activity as they develop an understanding and appreciation of the interconnectedness of these dimensions.

Students learn how body and movement concepts and the scientific bases of biophysical, sociocultural and psychological concepts and principles are relevant to their engagement and performance in physical activity. They engage in a range of activities to develop movement sequences and movement strategies.

Students learn experientially through three stages of an inquiry approach to make connections between the scientific bases and the physical activity contexts. They recognise and explain concepts and principles about and through movement and demonstrate and apply body and movement concepts to movement sequences and movement strategies.

Through their purposeful engagement in physical activities, students gather data to analyse, synthesise and devise strategies to optimise engagement and performance. They engage in reflective decision-making- as they evaluate and justify strategies to achieve a particular outcome.

Pathways

A course of study in Physical Education can establish a basis for further education and employment in the fields of exercise science, biomechanics, the allied health professions, psychology, teaching, sport journalism, sport marketing and management, sport promotion, sport development and coaching.

Objectives

By the conclusion of the course of study, students will:

- recognise and explain concepts and principles about movement
- demonstrate specialised movement sequences and movement strategies
- apply concepts to specialised movement sequences and movement strategies
- analyse and synthesise data to devise strategies about movement
- evaluate strategies about and in movement
- justify strategies about and in movement
- make decisions about and use language, conventions and mode-appropriate features for particular purposes and contexts.

Pre-requisites

Obtain a minimum C level of achievement in English and Physical Education in Year 10 or with HOD approval.

Special Requirements

Nil

Structure

Unit 1	Unit 2	Unit 3	Unit 4
Motor learning, functional anatomy, biomechanics and physical activity <ul style="list-style-type: none"> • Motor learning integrated with a selected physical activity • Functional anatomy and biomechanics integrated with a selected physical activity 	Sport psychology, equity and physical activity <ul style="list-style-type: none"> • Sport psychology in physical activity • Equity — barriers and enablers 	Tactical awareness, ethics and integrity and physical activity <ul style="list-style-type: none"> • Tactical awareness in physical activity • Ethics and integrity 	Energy, fitness and training and physical activity <ul style="list-style-type: none"> • Energy, fitness and training integrated in physical activity

Assessment: Schools devise assessments in Units 1 and 2 to suit their local context. In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A-E).

Sport & Recreation

Applied senior subject

Applied

Sport and recreation activities are a part of the fabric of Australian life and are an intrinsic part of Australian culture. These activities can encompass social and competitive sport, aquatic and community recreation, fitness and outdoor recreation. For many people, sport and recreation activities form a substantial component of their leisure time. Participation in sport and recreation can make positive contributions to a person's wellbeing.

Sport and recreation activities also represent growth industries in Australia, providing many employment opportunities, many of which will be directly or indirectly associated with hosting Commonwealth, Olympic and Paralympic Games. The skills developed in Sport & Recreation may be oriented toward work, personal fitness or general health and wellbeing. Students will be involved in learning experiences that allow them to develop their interpersonal abilities and encourage them to appreciate and value active involvement in sport and recreational activities, contributing to ongoing personal and community development throughout their lives.

Sport is defined as activities requiring physical exertion, personal challenge and skills as the primary focus, along with elements of competition. Within these activities, rules and patterns of behaviour governing the activity exist formally through organisations. Recreation activities are defined as active pastimes engaged in for the purpose of relaxation, health and wellbeing and/or enjoyment and are recognised as having socially worthwhile qualities. Active recreation requires physical exertion and human activity.

Physical activities that meet these classifications can include active play and minor games, challenge and adventure activities, games and sports, lifelong physical activities, and rhythmic and expressive movement activities.

Active participation in sport and recreation activities is central to the learning in Sport & Recreation. Sport & Recreation enables students to engage in sport and recreation activities to experience and learn about the role of sport and recreation in their lives, the lives of others and the community.

Engagement in these activities provides a unique and powerful opportunity for students to experience the challenge and fun of physical activity while developing vocational, life and physical skills.

Each unit requires that students engage in sport and/or recreation activities. They investigate, plan, perform and evaluate procedures and strategies and communicate appropriately to particular audiences for particular purposes.

Pathways

A course of study in Sport & Recreation can establish a basis for further education and employment in the fields of fitness, outdoor recreation and education, sports administration, community health and recreation and sport performance.

Objectives

By the conclusion of the course of study, students should:

- investigate activities and strategies to enhance outcomes
- plan activities and strategies to enhance outcomes
- perform activities and strategies to enhance outcomes
- evaluate activities and strategies to enhance outcomes

Structure

Sport & Recreation is a four-unit course of study. This syllabus contains 12 QCAA - developed units as options for schools to select from to develop their course of study.

Unit Option	Unit title
Unit 1	Fitness for sport and recreation
Unit 2	Event management
Unit 3	Coaching and officiating
Unit 4	Athlete development and wellbeing

Assessment: Students complete two assessment tasks for each unit. The assessment techniques used in Sport & Recreation are:

Technique	Description	Response requirements
Performance	Students investigate, plan, perform and evaluate activities and strategies to enhance outcomes in the unit context.	<p>Performance Performance: up to 4 minutes</p> <p>Investigation, plan and evaluation One of the following:</p> <ul style="list-style-type: none"> • Multimodal (at least two modes delivered at the same time): up to 3 minutes, 6 A4 pages, or equivalent digital media • Spoken: up to 3 minutes, or signed equivalent • Written: up to 500 words
Project	Students investigate, plan, perform and evaluate activities and strategies to enhance outcomes in the unit context.	<p>Investigation and session plan One of the following:</p> <ul style="list-style-type: none"> • Multimodal (at least two modes delivered at the same time): up to 3 minutes, 6 A4 pages, or equivalent digital media • Spoken: up to 3 minutes, or signed equivalent • Written: up to 500 words <p>Performance Performance: up to 4 minutes</p> <p>Evaluation One of the following:</p> <ul style="list-style-type: none"> • Multimodal (at least two modes delivered at the same time): up to 3 minutes, 6 A4 pages, or equivalent digital media • Spoken: up to 3 minutes, or signed equivalent • Written: up to 500 words

General senior subject

Biology provides opportunities for students to engage with living systems. Students plan and carry out fieldwork, laboratory and other research investigations and communicate biological understanding, findings, arguments and conclusions using appropriate representations, modes and genres.

Pathways

A course of study in Biology can establish a basis for further education and employment in the fields of medicine, forensics, veterinary, food and marine sciences, agriculture, biotechnology, environmental rehabilitation, biosecurity, quarantine, conservation and sustainability.

Objectives

By the conclusion of the course of study, students will:

- describe ideas and findings
- apply understanding
- analyse data
- interpret evidence
- evaluate conclusions, claims and processes
- investigate phenomena.

Pre-requisites

Obtain a minimum B level of achievement in Year 10 Biological Sciences or Physical Sciences. C level of achievement will require HOD approval.

Special Requirements

Nil

Structure

Unit 1	Unit 2	Unit 3	Unit 4
Cells and multicellular organisms <ul style="list-style-type: none"> • Cells as the basis of life • Exchange of nutrients and wastes • Cellular energy, gas exchange and plant physiology 	Maintaining the internal environment <ul style="list-style-type: none"> • Homeostasis — thermoregulation and osmoregulation • Infectious disease and epidemiology 	Biodiversity and the interconnectedness of life <ul style="list-style-type: none"> • Describing biodiversity and populations • Functioning ecosystems and succession 	Heredity and continuity of life <ul style="list-style-type: none"> • Genetics and heredity • Continuity of life on Earth

Assessment:

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A-E).

Summative assessments

• Student experiment			
Summative external assessment (EA): 50%			
• Examination			

General senior subject

Chemistry is the study of materials and their properties and structure. Students develop their appreciation of chemistry and its usefulness; understanding of chemical theories, models and chemical systems; expertise in conducting scientific investigations.

Pathways

A course of study in Chemistry can establish a basis for further education and employment in the fields of forensic science, environmental science, engineering, medicine, pharmacy and sports science.

Objectives

By the conclusion of the course of study, students will:

- describe ideas and findings
- apply understanding
- analyse data
- interpret evidence
- evaluate conclusions, claims and processes
- investigate phenomena.

Pre-requisites

Obtain a minimum B level of achievement in Year 10 Physical Sciences. C level of achievement will require HOD approval.

Special Requirements

Nil

Structure

Unit 1	Unit 2	Unit 3	Unit 4
Chemical fundamentals — structure, properties and reactions <ul style="list-style-type: none"> • Properties and structure of atoms • Properties and structure of materials • Chemical reactions — reactants, products and energy change 	Molecular interactions and reactions <ul style="list-style-type: none"> • Intermolecular forces and gases • Aqueous solutions and acidity • Rates of chemical reactions 	Equilibrium, acids and redox reactions <ul style="list-style-type: none"> • Chemical equilibrium systems • Oxidation and reduction 	Structure, synthesis and design <ul style="list-style-type: none"> • Properties and structure of organic materials • Chemical synthesis and design

Assessment: Schools devise assessments in Units 1 and 2 to suit their local context. In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A-E).

General senior subject

Marine Science provides opportunities for students to study an interdisciplinary science focusing on marine environments and the consequences of human influences on ocean resources. Students learn and apply aspects of the knowledge and skills of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society.

Pathways

A course of study in Marine Science can establish a basis for further education and employment in the fields of marine sciences, biotechnology, aquaculture, environmental rehabilitation, biosecurity, quarantine, conservation and sustainability.

Objectives

By the conclusion of the course of study, students will:

- describe ideas and findings
- apply understanding\
- analyse data
- interpret evidence
- evaluate conclusions, claims and processes
- investigate phenomena.

Pre-requisites

Obtain a minimum B level of achievement in in Year 10 Biological Sciences or Physical Sciences. C level of achievement will require HOD approval.

Special Requirements

Ability to swim

Structure

Summative external assessment (EA): 50% <ul style="list-style-type: none"> • Examination – combined response 			

General senior subject

Physics provides opportunities for students to engage with classical and modern understandings of the universe. Students develop appreciation of the contribution physics makes to society. They understand how models and theories are refined and new ones developed in physics; investigate phenomena and solve problems; collect and analyse data; and interpret evidence.

Pathways

A course of study in Physics can establish a basis for further education and employment in the fields of science, engineering, medicine and technology.

Objectives

By the conclusion of the course of study, students will:

- describe ideas and findings
- apply understanding
- analyse data
- interpret evidence
- evaluate conclusions, claims and processes
- investigate phenomena.

Pre-requisites

Obtain a minimum B level of achievement in Year 10 Physical Sciences. C level of achievement will require HOD approval.

It is recommended to take Mathematical Methods.

Special Requirements

Applied senior subject

Aquatic Practices provides opportunities for students to explore, experience and learn concepts and practical skills and knowledge valued in aquatic workplaces and other settings. Students gain insight into the management of aquatic regions and their ecological and environmental systems.

Pathways

A course of study in Aquatic Practices can establish a basis for further education and employment in the fields of recreation, tourism, fishing and aquaculture.

Objectives

By the conclusion of the course of study, students should:

- describe ideas and phenomena
- execute procedures
- analyse information
- interpret information
- evaluate conclusions and outcomes
- plan investigations and projects.

Pre-requisites

Obtain a minimum C level of achievement in any Year 10 Science.

Special Requirements

Ability to swim.

Structure: Aquatic Practices is a four-unit course of study. The four units will be selected from the following six QCAA developed units.

Unit option	Unit title
Unit 1	Using the aquatic environment
Unit 2	Recreational and commercial fishing
Unit 3	Coastlines and navigation
Unit 4	Aquatic ecosystems

Assessment: Students complete two assessment tasks for each unit. The assessment techniques used in Aquatic Practices are:

Technique	Description	Response requirements
Applied investigation	Students investigate a research question by collecting, analysing and interpreting primary or secondary information.	One of the following: <ul style="list-style-type: none"> • Multimodal (at least two modes delivered at the same time): up to 7 minutes, 10 A4 pages, or equivalent digital media • Written: up to 1000 words
Practical project	Students use practical skills to complete a project in response to a scenario.	<p>Completed project</p> <p>One of the following:</p> <ul style="list-style-type: none"> • Product: 1 • Performance: up to 4 minutes <p>Documented process</p> <p>Multimodal (at least two modes delivered at the same time): up to 5 minutes, 8 A4 pages, or equivalent digital media</p>

General senior subject

Japanese provides students with the opportunity to reflect on their understanding of the Japanese language and the communities that use it, while also assisting in the effective negotiation of experiences and meaning across cultures and languages. Students participate in a range of interactions in which they exchange meaning, develop intercultural understanding and become active participants in understanding and constructing written, spoken and visual texts.

Pathways

A course of study in Japanese can establish a basis for further education and employment in many professions and industries, particularly those where the knowledge of an additional language and the intercultural understanding it encompasses could be of value, such as business, hospitality, law, science, technology, sociology and education.

Objectives

By the conclusion of the course of study, students will:

- comprehend Japanese to understand information, ideas, opinions and experiences
- identify tone, purpose, context and audience to infer meaning
- analyse and evaluate information and ideas to draw conclusions
- apply knowledge of language elements of Japanese to construct meaning
- structure, sequence and synthesise information to justify opinions and perspectives
- communicate using contextually appropriate Japanese.

Pre-requisites

Obtain a minimum C level of achievement in Year 10 Japanese.

Special Requirements

- Computer access
- Excursion: Year 11 and Year 12 students may attend an excursion to Brisbane, Japanese Consulate

Course Structure

Unit 1	Unit 2	Unit 3	Unit 4
私の暮らし My world <ul style="list-style-type: none"> • Family/Carers • Peers • Education 	私達の世界をたんけんする Exploring our world <ul style="list-style-type: none"> • Travel and exploration • Social customs • Japanese influences around the world 	私達の社会、文化とアイデンティティ Our society; culture and identity <ul style="list-style-type: none"> • Lifestyle and leisure • The arts, entertainment and sports • Groups in society 	私の現在と将来 My present; my future <ul style="list-style-type: none"> • The present • Future choices

Assessment:

Schools devise assessments in Units 1 and 2 to suit their local context. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A-E).

General senior subject

Drama engages students in aesthetic learning experiences that develop the 21st century skills of critical thinking, creative thinking, communication, collaboration and teamwork, personal and social skills and information & communications technologies (ICT) skills. Additionally, students will develop personal confidence, skills of inquiry and social skills as they work collaboratively with others.

Pathways

A course of study in Drama can establish a basis for further education and employment in the field of drama and to broader areas in creative industries and cultural institutions, including arts administration and management, communication, education, public relations, research and science and technology.

Objectives

By the conclusion of the course of study, students will:

- demonstrate an understanding of dramatic languages
- apply literacy skills
- apply and structure dramatic languages
- analyse how dramatic languages are used to create dramatic action and meaning
- interpret purpose, context and text to communicate dramatic meaning
- manipulate dramatic languages to create dramatic action and meaning
- evaluate and justify the use of dramatic languages to communicate dramatic meaning

Pre-requisites

Obtain a minimum C level of achievement in English

Special Requirements

Students should be studying General English for Year 11/12

Structure

Unit 1	Unit 2	Unit 3	Unit 4
Share How does drama promote shared understandings of the human experience?	Reflect How is drama shaped to reflect lived experience?	Challenge How can we use drama to challenge our understanding of humanity?	Transform How can you transform dramatic practice?

Assessment: In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A-E).

Unit 3		Unit 4	
Summative internal assessment 1 (IA1):	20%	Summative internal assessment 3 (IA3):	35%
• Performance		• Project — practice-led project	
Summative internal assessment 2 (IA2):	20%		
• Project — dramatic concept			
Summative external assessment (EA): 25%			
• Examination — extended response			

Film, Television & New Media

General

General senior subject

Film, Television & New Media fosters creative and expressive communication. It explores the five key concepts of technologies, representations, audiences, institutions and languages. Students learn about film, television and new media as our primary sources of information and entertainment.

Pathways

A course of study in Film, Television & New Media can establish a basis for further education and employment in the fields of advertising, design, communication, creative industries, communication, and education.

Objectives

By the conclusion of the course of study, students will:

- design moving-image media products
- create moving-image media products
- resolve film, television and new media ideas, elements and processes
- apply literacy skills
- analyse moving-image media products
- evaluate film, television and new media products, practices and viewpoints.

Pre-requisites

Obtain a minimum C level of achievement in Year 10 English.

Special Requirements

Prior experience in Junior Encore Studies or Year 10 Media Studies is encouraged but not recommended.

Structure

Unit 1	Unit 2	Unit 3	Unit 4
Foundation Technologies: How are tools and associated processes used to create moving-image media? Institutions: How are institutional practices influenced by social, political and economic factors? Languages: How do signs and symbols, codes and conventions create meaning?	Stories Representations: How do representations function in stories? Audiences: How does the relationship between narrative and meaning change in different contexts? Languages: How are media languages used to construct stories?	Participation Technologies: How do technologies enable or constrain participation? Audiences: How do different contexts and purposes impact the participation of individuals and cultural groups? Institutions: How is participation in institutional practices influenced by social,	Artistry Technologies: How do media artists use technologies to challenge conventional practices? Representations: How do media artists portray people, places, events, ideas and emotions? Languages: How do media artists use signs, symbols, codes and conventions to create meaning?

Assessment: In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A-E).

Unit 3		Unit 4	
Summative internal assessment 1 (IA1):	15%	Summative internal assessment 3 (IA3):	35%
<ul style="list-style-type: none"> • Case study investigation 		<ul style="list-style-type: none"> • Stylistic project

Summative external assessment (EA): 25% <ul style="list-style-type: none"> • Examination — extended response 			

Music (Alternative Sequence)

General

General senior subject

Music fosters creative and expressive communication. It allows students to develop musicianship through making (composition and performance) and responding (musicology).

A study of music provides students with opportunities to develop their intellect and personal growth. In an age of change, Music has the means to prepare students for a future of unimagined possibilities; in Music, students develop highly transferable skills and the capacity for flexible thinking and doing.

Pathways

A course of study in Music can establish a basis for further education and employment in the fields of arts administration, communication, education, creative industries, public relations and science and technology.

Objectives

By the conclusion of the course of study, students will:

- use music elements and concepts
- analyse music and apply compositional devices
- apply literacy skills and interpret music elements and concepts
- evaluate music to justify the use of music elements and concepts
- realise and resolve music ideas

Pre-requisites

Year 10 Music (recommended, but not mandatory)

Obtain a minimum C level of achievement in General English

Special Requirements

Nil

Structure

Unit 1	Unit 2	Unit 3	Unit 4
Innovations Through inquiry learning, the following is explored: How do musicians incorporate innovative music practices to communicate meaning when performing and composing?	Narrative Through inquiry learning, the following is explored: How do musicians manipulate music elements to communicate narrative when performing, composing and responding to music?	Designs Through inquiry learning, the following is explored: How does the treatment and combination of different music elements enable musicians to design music that communicates meaning through performance and composition?	Identities Through inquiry learning, the following is explored: How do musicians use their understanding of music elements, concepts and practices to communicate cultural, political, social and personal identities when performing, composing and responding to music?

Assessment: In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A-E).

Unit 3		Unit 4	
Summative internal assessment 1 (IA1):	20%	Summative internal assessment 3 (IA3):	35%
• Performance		• Project	
Summative internal assessment 2 (IA2):	20%		
• Composition			
Summative external assessment (EA): 25%			

General senior subject

Music fosters creative and expressive communication. It allows students to develop musicianship through making (composition and performance) and responding (musicology).

In Music Extension, students follow an individual program of study designed to continue the development of refined musicianship skills. Music Extension encourages students to investigate music concepts and ideas relevant to their specialisation (Performance, Composition or Musicology).

Pathways

A course of study in Music can establish a basis for further education and employment in the fields of arts administration, communication, education, creative industries, public relations and science and technology.

Objectives

By the conclusion of the course of study, students will:

- use music elements and concepts
- analyse music and apply compositional devices
- apply literacy skills and interpret music elements and concepts
- evaluate music to justify the use of music elements and concepts
- realise and resolve music ideas

Pre-requisites

Enrolment in the Year 12 Music course is mandatory.

Special Requirements

Nil

Structure

Unit 3	Unit 4
Explore Students enter into an apprenticeship and work towards realising their potential as composers, musicologists or performers. As an apprentice, students will work alongside an expert, artisan and/or resource to explore their specialisation.	Emerge Students draw on their experiences from Unit 3 to realise their potential as composers, musicologists or performers. As emerging artists, students critically reflect on their musicianship and refine practice in an endeavour to discover their personal style as musicians. They operate with increasing independence and sophistication through independent application of the subject matter from Unit 3 and through the student's emerging individual music voice or identity.

Assessment: In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A-E).

Unit 3		Unit 4	
Summative internal assessment 1 (IA1):	20%	Summative internal assessment 3 (IA3):	35%
• Performance/Composition/Musicology		• Performance/Composition/Musicology Project	
Summative internal assessment 2 (IA2):	20%		
• Performance/Composition/Musicology			
Summative external assessment (EA): 25%			

General senior subject

Visual Art provides students with opportunities to understand and appreciate the role of visual art in past and present traditions and cultures, as well as the contributions of contemporary visual artists and their aesthetic, historical and cultural influences. Students interact with artists, artworks, institutions and communities to enrich their experience and understandings of their own and other's art practices.

Pathways

A course of study in Visual Art can establish a basis for further education and employment in the fields of arts practice, design, craft and information technologies; broader areas in creative industries and cultural institutions.

Objectives

By the conclusion of the course of study, students will:

- implement ideas and representations
- apply literacy skills
- analyse and interpret visual language, expression and meaning in artworks and practices
- evaluate influences
- justify viewpoints
- experiment in response to stimulus
- create visual responses using knowledge and understanding of art media
- realise responses to communicate meaning.

Pre-requisites

Obtain a minimum C level of achievement in Art and General English

Special Requirements

Nil

Structure

Applied senior subject

Visual Arts in Practice focuses on students engaging in art-making processes and making virtual or physical visual artworks. Visual artworks are created for a purpose and in response to individual, group or community needs.

Pathways

A course of study in Visual Arts in Practice can establish a basis for further education and employment in a range of fields, including design, styling, decorating, illustrating, drafting, visual merchandising, make-up artistry, advertising, game design, photography, animation or ceramics.

Objectives

By the conclusion of the course of study, students should:

- use visual arts practices
- plan artworks
- communicate ideas
- evaluate artworks.

Pre-requisites

Obtain a minimum C level of achievement in Art (Year 9 or 10) and English recommended

Special Requirements

An interest in the Arts industry.

Structure

Core	Electives
<ul style="list-style-type: none"> • Visual mediums, technologies, techniques • Visual literacies and contexts • Artwork realisation 	<ul style="list-style-type: none"> • 2D, 3D, Digital and 4D, Design, Craft

Assessment: For Visual Arts in Practice, assessment from Units 3 and 4 is used to determine the student's exit result, and consists of four instruments, including: at least two projects, with at least one project arising from community connections and at least one product (composition), separate to an assessable component of a project.

Project	Product	Extended response	Investigation
<p>A project consists of:</p> <ul style="list-style-type: none"> • a product component: variable conditions • at least one different component from the following <ul style="list-style-type: none"> • written: 500-900 words • spoken: 2½-3½ minutes • multimodal <ul style="list-style-type: none"> ○ non-presentation: 8 A4 pages max (or equivalent) ○ presentation: 3-6 minutes. 	<ul style="list-style-type: none"> • variable conditions 	<p>Presented in one of the following modes:</p> <ul style="list-style-type: none"> • written: 600-1000 words • spoken: 3-4 minutes • multimodal <ul style="list-style-type: none"> ○ non-presentation: 10 A4 pages max (or equivalent) ○ presentation: 4-7 minutes. 	<p>Presented in one of the following modes:</p> <ul style="list-style-type: none"> • written: 600-1000 words • spoken: 3-4 minutes • multimodal <ul style="list-style-type: none"> ○ non-prsentation: 10 A4 pages max (or equivalent) ○ presentation: 4-7 minutes.

CHC24015 – Certificate II in Active Volunteering

(RTO: 6020) Australian College of Volunteering. Offline Course: Year 11/12

Subject type:	VET qualification	Duration:	11 months
Qualification description:	<p>Certificate II in Active Volunteering is a nationally recognised qualification that complies with the Australian Qualification Framework.</p> <p>This qualification reflects the role of individuals volunteering in the community.</p>		
Entry requirements:	<p>There are no entry requirements for this qualification.</p> <p>Located on the grounds of Maroochydore State High School, the Active Volunteering course focuses on helping people in disadvantaged areas – primarily working with those in Cambodia. This Certificate is aligned with the Humanitarian Project. It is designed for those students who have the desire and commitment to helping others.</p>		
Qualification Packaging Rules:	<p>Total units = 6 (4 core units + 2 elective units).</p> <p>20 hours of Volunteering</p> <p>The selection of electives must be guided by the job outcome sought, local industry requirements and the complexity of skills appropriate to the AQF levels of this qualification.</p>		
Competencies - Core and Electives:	<p>BSBCMM201 (C) Communicate in the Workplace</p> <p>HLTWHS001 (C) Participate in Workplace Health and Safety</p> <p>CHCVOL001 (C) Be an Effective Volunteer</p> <p>CHCDIV001 (C) Work with Diverse People</p> <p>BSBTEC201 Use business Software applications</p> <p>BSBTEC202 Use Digital Technologies to Communicate in a Work Environment</p> <p>HLTAID011 Provide First Aid</p> <p>BSBPFE202 Plan and Time Management</p>		
Learning experiences:	<ul style="list-style-type: none"> • RTO classroom • Activities in real/simulated training work environments • Real life experiences in the various activities in the community locally and abroad. • Team Work • Real-life- decision making • Teaching English • 20 hours Active Volunteering 		
Assessment:	<p>Assessment is competency based and therefore no levels of achievement are awarded. Evidence gathering for this qualification is continuous and units of competency have been clustered into groups and assessed this way.</p> <p>Evidence gathering methods include:</p> <ul style="list-style-type: none"> • Direct observation checklist • Product resulting from an activity • Direct verbal or written questioning checklist • Reports from workplace supervisor 		
Pathways:	<p>This qualification provides a pathway to work in many areas world-wide. The Certificate will assist those who are willing to push themselves to help others. Volunteer, Teaching English in Developing Countries, Overseas and Abroad work, Nurse, Doctor, Teacher.</p>		
Fees (Additional to SRS charges):	<p>The Certificate is \$135 and is included in the cost of the Humanitarian Project.</p>		
Further information:	<p>Contact the VET HOD/RTO Manager, Ms Gerbo, lgerb1@eq.edu.au for information regarding support services and other general VET information. Students will be provided with access to a <i>Student VET Handbook</i> prior to enrolment.</p> <p>For further information on services, training and assessment refer to SAAVI.</p>		
Service agreement:	<p>This is an 11-month course. The RTO guarantees that the student will be provided with every opportunity to complete the CHC2401 Certificate II in Active Volunteering as per the rights and obligations outlined in the enrolment process and information handbooks provided. Students successfully achieving all qualification requirements will be provided with a Qualification and record of results. Students who achieve at least one unit (but not the full qualification) will receive a Statement of Attainment.</p> <p><i>This information is correct at time of publication but subject to change (June 2025).</i></p>		

BSB30120 – Certificate III in Business

(RTO: 31319) Binnacle Training

Subject type:	VET qualification	Duration:	2 years																												
Qualification description:	<p>Binnacle's Certificate III in Business program is offered as a senior subject where students learn what it takes to become a Business Professional. Students develop a range of essential business skills including personal management and effective communication techniques, customer service, leadership and innovation, critical thinking, business technology and documents, financial literacy, workplace health and safety, inclusive work practices and participate in sustainable work practices</p> <p>QCE Credits: Successful completion of the Certificate III in Business contributes a maximum of eight (8) credits towards a student's QCE. A maximum of eight (8) credits from the same training package can contribute to a QCE.</p>																														
Entry requirements:	<p>Students must have a passion for and/or interest in working in the Business Services industry and/or pursuing further tertiary pathways (eg Certificate IV, Diploma and Bachelor of Business). They must have good quality written and spoken communication skills and an enthusiasm/motivation to participate in a range of projects. Students must have a laptop with appropriate software and internet access to take this subject. A Language, Literacy and Numeracy (LLN) Screening process is undertaken at the time of initial enrolment (or earlier) to ensure students have the capacity to effectively engage with the content and to identify support measures as required.</p>																														
Qualification Packaging Rules:	<p>Total number of units = 13 6 core unit plus 7 elective units, plus 2 optional additional units</p> <p>Elective units must be relevant to the work environment and the qualification, maintain the integrity of the AQF alignment and contribute to a valid, industry supported- vocational outcome. Successful completion of the Certificate may contribute a possible 8 credits towards achieving a Queensland Certificate of Education.</p>																														
Competencies - Core and Electives:	<table border="0"> <tr> <td>BSBPEF201</td><td>Support personal wellbeing in the workplace</td> <td>BSBTWK301</td><td>Use inclusive work practices</td> </tr> <tr> <td>BSBPEF301</td><td>Organise personal work priorities</td> <td>BSBXTW301</td><td>Work in a team</td> </tr> <tr> <td>FNSFLT311</td><td>Develop and apply knowledge of personal finances</td> <td>BSBCRT311</td><td>Apply critical thinking skills in a team environment</td> </tr> <tr> <td>BSBWHS311</td><td>Assist with maintaining workplace safety</td> <td>BSBTEC301</td><td>Design and produce business documents</td> </tr> <tr> <td>BSBSUS211</td><td>Participate in sustainable work practices</td> <td>BSBWRT311</td><td>Write simple documents</td> </tr> <tr> <td>BSBXCM301</td><td>Engage in workplace communication</td> <td>BSBTEC201</td><td>Use business software applications</td> </tr> <tr> <td></td><td></td> <td>BSBTEC203</td><td>Research using the internet</td> </tr> </table> <p><i>* Elective units are subject to change prior to the commencement of the program.
